BULK GARDEN SEED DEPARTMENT

LEONARD'S

GARDEN SEED IN BULK ARE THE BEST BY TEST

OVER 5,000 MARKET GARDENERS AROUND THE CITY OF CHICAGO USE
LEONARD'S BULK SEEDS EVERY YEAR, AND PREFER THEM
TO ALL OTHER KINDS

QUANTITY PRICES QUOTED ON APPLICATION

NOTICE: THE PRICES QUOTED ON ALL SEEDS AND GOODS LISTED IN THIS SUPPLEMENT REPRESENT VALUES AT THE TIME OF GOING TO PRESS. WE AIM TO GIVE OUR CUSTOMERS THE BENEFIT OF THE LOWEST PRICES THAT MARKET CONDITIONS WILL WARRANT. THEREFORE WE RESERVE THE RIGHT TO CHANGE OUR PRICES WITHOUT FURTHER NOTICE.

Introduction

SPRAYING is the most important operation on the farm, and it is only by spraying with suitable materials that most of the troublesome insect pests and fungous diseases of fruit trees and garden crops can be controlled. Spraying, likewise, with the right materials, will protect the health of live stock, by controlling pests which infest their skin and by maintaining their quarters in a sanitary condition.

There is no one spray that will cure everything. Use the spray that will best fit your case. Spray thoroughly. Direct your atten-

tion to the parts that are hardest to reach, for it is in such places that the pests are most liable to exist in greatest numbers. Cover every surface, and drive the spray into cracks and crevices. When spraying fruit trees get the spray into the buds and into the calyx cup of apples and pears. Wet the upper and lower surfaces of the leaves.

Spraying is much more of a preventative than a cure, especially in the control of diseases. Plants that are sprayed before the diseases, such as scab, rots of various kinds and mildews, will be protected from damage by the organisms causing the diseases. But after the diseases are at work, damage already has been done and no kind of spraying will cure it.

Spray Calendar for Control of Insects and Fungous Diseases of Fruits and Vegetables

Fruit	Insect or Disease	What to Use	Dillution* (See bottom of page)	When to Spray
APPLE	San Jose Scale	Dry Lime-Sulfur	12 to 15 lbs.	In fall after leaves drop or in spring when trees are dormant
	Oyster Shell Scale	Dry Lime-Sulfur	12 to 15 lbs.	In fall after leaves drop or in spring when trees are dormant
	Scurfy Scale	Dry Lime-Sulfur	12 to 15 lbs.	In fall after leaves drop or in spring when trees are dormant
	Apple Aphis	Spra-Mulsion	3 to 4 gals.	When buds are showing tip-green
	Codling Moth	Dry Arsenate of Lead	1 to 1½ lbs.	(1) At fall of the blossoms, before the calyx closes (2) Three weeks after fall of the blossoms (3) Ten weeks after fall of the blossoms (4) Fourteen weeks after fall of the blossoms (5) Seventeen weeks after fall of the blossoms
	Curculio	Dry Arsenate of Lead	1 to 1½ lbs.	(1) Just before bloom, in cluster-bud (2) At fall of blossoms (3) Three or four weeks later (4) Ten weeks after fall of the blossoms
	Apple Maggot	Dry Arsenate of Lead	1 to 2 lbs.	(1) Last week in July (2 & 3) Three and six weeks later
	Red Bugs	Nicotine Sulfate Soap	½ pint 2½ lbs.	(1) Just before blossoms in cluster bud (2) At fall of blossoms
	Bud Moth	Dry Arsenate of Lead	1 to 1½ lbs.	(1) When flower clusters first appear (2) Just before blossoms open
	Canker Worm	Dry Arsenate of Lead	1 to 2 lbs.	(1) Just before bloom in cluster-bud (2) At fall of blossoms
	Apple-Tree Tent Caterpillar	Dry Arsenate of Lead	1½ to 2 lbs.	When worms first appear
	Anthracnose	Dry Bordo	9 lbs.	(1) About September 15th (2) As soon as fruit is picked (3) Two or three weeks later
	Bitter Rot	Dry Bordo	9 lbs.	Spray about the middle of June and keep fruit coated the rest of the season
	Black Rot	Dry Bordo	9 lbs.	(1) About mid-July (2) Two weeks later
	Blotch	Dry Lime-Sulfur Dry Bordo	4 lbs. 7 to 9 lbs.	(1) Two to three weeks after fall of blossoms (2) Five weeks after fall of blossoms
	Powdery Mildew	Dry Lime-Sulfur	3 lbs.	(1) At the fall of the blossoms (2) Three weeks later In extreme cases, two additional applications at three-week intervals may be required
	Cedar Rust			Cut down cedars within one mile of orchard
	Scab	Dry Lime-Sulfur Dry Bordo	3 to 4 lbs. 7 lbs.	(1) Just before blossoms in cluster bud (2) At fall of blossoms (3) Within a week or ten days later (4) Latter part of July in Atlantic States if weather is cool and wet
	Sooty Blotch	Dry Bordo	9 lbs.	Apply the middle of July
CHERRY	Fruit Flies	Dry Arsenate of Lead	1 to 1½ lbs.	(1) Early in June (2) Mid-June
	Curculio	Dry Arsenate of Lead	1 to 1½ lbs.	(1) Just before the blossom buds open (2) At fall of blossoms (3) A week to ten days later
	Cherry Slug	Dry Arsenate of Lead	1 to 1½ lbs.	When slugs appear
	Cherry Aphis	Nicotine Sulfate Soap	½ pint 2 lbs.	As soon as lice appear, but before leaves curl
	Brown Rot	Dry Lime-Sulfur	1 to 1½ lbs.	(1) Just before the bloom (2) At fall of blossoms (3) A week to ten days later (4) When fruit begins to color
	Leaf Spot	Dry Lime-Sulfur	1 to 1½ lbs.	(1) At fall of calyx (2) Ten days to two weeks later (3) Directly after fruit is picked, and three weeks later

*To 50 gals. water

Spray Calendar for Control of Insects and Fungous Diseases of Fruits and Vegetables—Continued

Fruit	Insect or Disease	What to Use	Dilution* (See bottom of page)	When to Spray
CURRENT AND GOOSEBERRY	Current Worm	Dry Arsenate of Lead	1 to 1½ lbs.	When worms first appear
	San Jose Scale	Dry Lime-Sulfur	12 to 15 lbs.	Early in spring while plants are dormant
	Current Plant Louse	Nicotine Sulfate Soap	½ pint 2 lbs.	As soon as eggs hatch in spring, but before leaves curl
	Anthracnose	Dry Lime-Sulfur Dry Bordo	3 to 4 lbs. 9 lbs.	(1) When leaves are unfolding (2) Every ten days to two weeks until five or six sprays have been applied
	Leaf Spot Powdery Mildew	Dry Lime-Sulfur Dry Lime-Sulfur	3 to 4 lbs. 3 to 4 lbs.	Same as Anthracnose (1) When buds burst (2) At ten-day intervals until five applications have been made
GRAPE	Rose Chafer	Dry Arsenate of Lead Molasses	2 lbs. 1 gal.	At first appearance of beetles and one week later if beetles are still present
	Flea Beetle	Dry Arsenate of Lead	1 to 1½ lbs.	Between middle of June and middle of July
	Leaf Hopper	Nicotine Sulfate Soap	1½ pints 2 lbs.	Early in July
	Grape Berry Moth	Dry Arsenate of Lead	1½ lbs.	(1) Just before fruit sets (2) About ten days later (3) Mid-July
	Grape Root Worm	Dry Arsenate of Lead	1½ lbs.	(1) Soon after beetles appear (2) Ten days later
	Black Rot	Dry Bordo	7 to 9 lbs.	(1) When second or third leaf is showing (2) Before the blossoms open (3) After fall of blossoms (4) About ten days to two weeks later (5) Again in ten to fourteen days
	Powdery Mildew	Superfine Dusting Sulfur		(1) When shoots are six to eight inches long (2) Just before or during bloom (3) On very susceptible varieties (California) about the time the grapes are half grown
PEACH	San Jose Scale	Dry Lime-Sulfur	12 to 15 lbs.	In fall after leaves drop or spring before buds swell
	Peach Tree Borer			Dig out borers in June and September
	Peach Twig Borer	Dry Lime-Sulfur	12 to 15 lbs.	Just after buds begin to swell
	Curculio	Dry Arsenate of Lead Lime	1 to 1½ lbs. 3 lbs.	(1) When first shucks are pushing off (2) Again when all shucks are off (3) Three or four weeks after fall of blossoms
	Brown Rot	Self-Boiled Lime and Sulfur	8 lbs. of each	(1) When all shucks are off (2) Three or four weeks after fall of blossoms (3) Four weeks before fruit is ripe Should weather turn damp and warm near ripening time, keep fruit well coated with spray
	Scab	Self-Boiled Lime and Sulfur	8 lbs. of each	Spraying for Brown Rot controls Scab
	Leaf Curl	Dry Lime-Sulfur	12 to 15 lbs.	Either in fall after leaves drop or in spring before buds swell
PEAR	San Jose Scale	Dry Lime-Sulfur	12 to 15 lbs.	In fall after leaves drop or in spring before buds burst
	Slug	Dry Arsenate of Lead	1 lb.	When slugs appear
	Pear Psylla	Spra-Mulsion Dry Lime-Sulfur	3 to 4 gals. 12 to 15 lbs.	(1) On warm days in November, December, March or April (2) When cluster-buds are separating at tips
	Pear Thrips	Nicotine Sulfate Soap	½ pint and 2½ lbs.	(1) When first buds begin to open (2) At the fall of the blossoms
	Pear Leaf Blister Mite	Dry Lime-Sulfur or Spra-Mulsion	12 to 15 lbs. 3 to 4 gals.	In fall after leaves drop, or in the spring before the buds burst
	Pear Blight	No Spray Remedy		Cut out and disinfect
	Scab	Dry Lime-Sulfur or Dry Bordo	3 to 4 lbs. 9 lbs.	(1) When leaf buds are unfolding (2) Just before flower-buds open (3) At the fall of the blossoms
PLUM	San Jose Scale	Dry Lime-Sulfur	12 to 15 lbs.	In spring before buds burst

*To 50 gals. water

BARRETT HARDWARE CO., JOLIET, ILL.

Spray Calendar for Control of Insects and Fungous Diseases of Fruits and Vegetables—Continued

Fruit or Vegetable	Insect or Disease	What to Use	Dillution* (See bottom of page)	When to Spray
PLUM	Curculio	Dry Arsenate of Lead Lime	1 to 1½ lbs. 2 to 3 lbs.	(1) Just before blossom-buds open (2) At fall of blossoms (3) A week or ten days later
	Gouger	Dry Arsenate of Lead Lime	1 to 1½ lbs. 2 to 3 lbs.	Same as for Curculio, except apply an extra spray before the bloom
	Brown Rot	Dry Lime-Sulfur	1 to 1½ lbs.	(1) Just before buds open (2) Immediately after blossoms fall (3) Ten days to two weeks later If season is wet, spray every two weeks until month before picking time
	Leaf Blight	Dry Lime-Sulfur	1 to 1½ lbs.	(1) Ten days after fall of blossoms (2) Three weeks later (3) Six weeks after fall of blossoms
RASPBERRY	Rose Scale	Dry Lime-Sulfur	12 to 15 lbs.	Late in winter
	Anthrachnose	Dry Lime-Sulfur or Dry Bordo	3 to 4 lbs. 7 lbs.	(1) When new shoots are six inches high (2) When ten inches high (3) Just before blossoms
STRAWBERRY	Strawberry Weevil	Dry Arsenate of Lead	1 to 1½ lbs.	When flowers are in the bud
	Leaf Roller	Dry Arsenate of Lead	1½ lbs.	A week after moths appear
	Slug	Dry Arsenate of Lead	1 to 1½ lbs.	When the worms appear, when berries are half-grown
	Leaf Spot	Dry Bordo	7 to 9 lbs.	(1) Before blossoms open (2) Ten days to two weeks later
ORANGE GRAPEFRUIT AND LEMON	Red Spiders and Mites	Dry Lime-Sulfur	3 to 4 lbs.	When spiders are numerous
	Brown Rot	Dry Bordo	4 to 5 lbs.	During winter
ASPARAGUS	Asparagus Beetle	Dry Arsenate of Lead	6 lbs.	Leave every tenth row uncut and spray from both sides. Apply three or four sprays at frequent intervals
	Rust			Spraying of little value. Plant resistant varieties
BEAN	Bean Ladybird	Dry Arsenate of Lead	2 lbs.	When beetles and eggs appear
	Bean Weevil	Carbon Bisulfide	1 oz. to 100 lbs. of seed	Fumigate seed
	Anthrachnose	Dry Bordo	9 lbs.	While cotyledons or original seed parts are still in seedlings
	Blight			Plant healthy seed
BEET	Leaf Spot	Dry Bordo	7 lbs.	Early in spring when plants are small
CABBAGE AND CAULI- FLOWER	Cabbage Worms	Dry Arsenate of Lead Soap	1 lb. 5 to 6 lbs.	When worms appear. Force spray into center of plants
	Cabbage Looper	Dry Arsenate of Lead Soap	1 lb. 5 to 6 lbs.	When worms appear, and force spray into center of the plants
	Cabbage Aphis	Nicotine Sulfate Soap	½ pint 5 to 6 lbs.	When lice first appear
CELERY	Early and Late Blight	Dry Bordo	7 lbs.	Spray frequently
CORN	Corn Ear Worm	S-W 50-50 Dusting Mixture	50 lbs. each of Sulfur and Arsenate of Lead	Soon after silk appears and every week until corn is picked
CUCUMBER	Striped Cucumber Beetle	Bordo Arsenate	7 lbs.	Spray frequently to repel beetles
	Wilt			Disease carried by cucumber beetles. Therefore, keep beetles away from vines
EGGPLANT	Flea Beetle	Bordo Arsenate	7 lbs.	Frequent applications
MUSKMELLON CANTALOUPE	Striped Cucumber Beetle	Same as for Cucumber		
	Wilt	Same as for Cucumber		
	Rust			Plant rust-resistant varieties
	Aphis	Nicotine Sulfate Soap	½ pint 2½ lbs.	When lice appear. Spray underside of leaves
ONION	Thrips	Nicotine Sulfate Soap	½ pint 2½ lbs.	Spray frequently in crotch of plants
	Smut	40% Formaldehyde	3 pints	Apply as drip at seeding time
	Mildew	Dry Bordo	7 lbs.	Spray frequently
PEPPER	Rot	Dry Bordo	7 lbs.	Spray two or three times during fruiting season

*To 50 gals. water

Spray Calendar for Control of Insects and Fungous Diseases of Fruits and Vegetables—Continued

Vegetable	Insect or Disease	What to Use	Dilution* (See bottom of page)	When to Spray
POTATO	Colorado Potato Beetle	Dry Arsenate of Lead or Potato Spray	1 to 2 lbs. 1½ to 3 lbs.	When eggs hatch and thereafter until insects disappear
	Flea Beetle	Bordo Arsenate	9 lbs.	Spray frequently as repellent
	Aphis	Nicotine Sulfate Soap	½ pint 2½ lbs.	When lice appear
	Scab	Corrosive Sublimate	4 oz. to 30 gals. of water	Soak uncut potatoes for 30 minutes
	Black Scurf	Corrosive Sublimate	4 oz. to 30 gals. of water	Soak uncut potatoes for 30 minutes
	Late Blight	Potato Spray	1½ to 3 lbs.	Begin when plants are six inches high, and thereafter at ten-day intervals until four or five sprays have been applied
	Early Blight	Potato Spray	1½ to 3 lbs.	Begin when plants are six inches high, and thereafter at ten-day intervals until four or five sprays have been applied
SQUASH	Tip-Burn (Not a disease)	Potato Spray	1½ to 3 lbs.	(Spraying is claimed to slightly check tip-burn)
	Striped Cucumber Beetle	Bordo Arsenate	7 lbs.	Spray frequently to repel beetles
	Squash Bug	Nicotine Sulphate Soap	½ pint 2½ lbs.	When young bugs appear
SWEET POTATOES				Sweet Potato diseases are not controlled by spraying, but by (1) Disinfecting of seed. (2) Seed selection. (3) Rotation
TOMATO	Tomato Worms	Dry Arsenate of Lead	1 to 1½ lbs.	When worms appear
	Leaf Spot	Dry Bordo	7 lbs.	At setting time and two-week intervals up into picking season
	Wilt			Not controlled by spraying
	Blossom-End Rot			Not a disease. Due to lack of moisture

*To 50 gals. water

Mix all ingredients separately in a quart of water and strain through cheese cloth, then add water to complete formula. Use level tablespoon or 4 level teaspoons for each level tablespoon.

WHITEWASHING SOLUTION (U. S. Government Formula)

Slack ½ bushel of quick lime with boiling water (keeping it covered during the process), strain and add a peck of salt dissolved in warm water, 3 pounds of ground rice which has been boiled to a thin paste, ½ pound of Spanish whiting and 1 pound of clear glue dissolved in warm water. Mix these materials well together and let stand for several days. Dilute with sufficient water to flow freely, straining the wash through a piece of cheese cloth into the sprayer tank. A small quantity of laundry bluing will add to the whiteness of the surface.

Notice to Home Gardeners

In order to assist the small fruit grower and gardener the following schedule is presented which will give in level tablespoons the proper quantity of insecticide or fungicide to use in one gallon of water.

M-S Dry Arsenate of Lead

Seed Fruits and Truck Crops:

4 to 6 tablespoons in one gallon of water.

Stone Fruits:

4 tablespoons in one gallon of water.

Potatoes:

6 to 8 tablespoons in one gallon of water.

M-S Dry Lime-Sulfur

Dormant Spray:

16 to 22 tablespoons in one gallon of water.

Summer Spray—Seed Fruits:

4 to 5 tablespoons in one gallon of water.

Summer Spray—Stone Fruits(except Peaches):

2 tablespoons and 6 tablespoons of hydrated lime

M-S Arsenate of Calcium

Seed Fruits and Truck Crops:

4 to 6 tablespoons in one gallon of water.

Potatoes:

6 to 8 tablespoons in one gallon of water.

M-S Paris Green

Potatoes:

1 to 3 teaspoons in one gallon of water, and

6 tablespoons of hydrated lime.

M-S Bordo Arsenate

General Truck Crops and Seed Fruits:

12 to 15 tablespoons in one gallon of water.

Stone Fruits (except Peaches):

10 tablespoons in one gallon of water.

Pyrox

REG. U. S. PAT. OFF.
TRADE MARK REGISTERED

What It Is:

—a powerful fungicide; it helps to control most fungous diseases, even some of the serious ones which are difficult to control.

—a strong poison insecticide; it kills most chewing insects.

Over twenty years of practical farm use has proved Pyrox the most effective remedy against both serious fungous diseases and chewing insects. It contains the essential copper in proper quantity for safe use and in most active form for greatest fungicidal effect. In Pyrox the poison insecticide is chemically blended with the copper fungicide which increases the effectiveness of both.

What It Does:

—It saves labor; it is easy to use, simply mix with cold water and spray.

—It goes farther than the ordinary spray; it is so smooth and fine that the finest nozzle can

be used without clogging. The resulting mist-like spray covers more surface.

—It gives more thorough protection. It should be put on with a fine nozzle because when applied in the finest mist it covers more thoroughly every part of the leaf or fruit.

—It gives more lasting protection; it sticks like paint and stays on for weeks. Even hard rains do not wash it off once it is thoroughly dry.

—It increases yields; the copper fungicide in Pyrox stimulates the leaves, makes them greener and more vigorous, and helps to increase yields even when there is no disease.

"Never Saw A Bug"

"The potatoes that I sprayed with Pyrox kept green until the frost killed them, without a sign of blight. I never saw a bug on them after using Pyrox. It is easier to apply than any mixture I have ever used, and will not wash off in the heaviest showers."—L. A. LITTLEFIELD, winner of the first prize of \$200 in a Maine potato growing contest.

Pyrox

"The Spray that Adds to Your Profit"

kills the bugs as fast as they appear, and prevents blight and rot. Use it on the young plants before bugs or blights get their start.

Get this Pyrox Crop Book. It tells how to protect your crops against bugs, worms and disease. Ask for a copy.

Spray Early and Save Your Crops

*We highly recommend the Martin-Senour Line
of Insecticides and Fungicides*

DRY LIME-SULFUR

The use and success of Lime-Sulfur Solution is known to practically every fruit grower in the country, and every grower is also familiar with the inconveniences and unpleasantness in connection with the handling of Liquid Lime-Sulfur. The barrels are very heavy to handle—they contain over 50 per cent water, which means heavy freight charge. Liquid Lime-Sulfur freezes in cold weather and leaks from the barrel in summer, and all in all is very unpleasant to handle. Martin-Senour Dry Lime-Sulfur is standard Lime-Sulfur Solution in dry powdered form—the first and only one of its kind on the market. It has all the advantages of the liquid material, and eliminates the disadvantages. Its effectiveness has been proven by thousands of orchardists and Experiment Stations.

Protected by U. S. Patent No. 1,254,908.

Price—Market

DRY POWDERED ARSENATE OF LEAD

Because of its unusual lightness, stays thoroughly in suspension during spraying operations, thus giving the spray uniform strength. It contains from 30 to 33 per cent arsenic oxide thoroughly in combination with lead and less than one per cent water soluble arsenic. This means that it has maximum killing power, speedy action and unquestionable effectiveness in controlling leaf-eating and chewing insects, and, due to its low percentage of water soluble arsenic, there is no danger of burning the foliage. Its unusual adhesiveness is another point in its favor.

Price—Market

DRY BORDO

Martin-Senour Dry Bordo is a true Bordeaux Mixture in dry powdered form, requiring only to be mixed with cold water to give a standard Bordeaux Mixture spray. The convenience and value of having Bordeaux Mixture in dry powdered form will be instantly recognized by all fruit growers.

Price—Market

SUPERFINE SULFUR

Many growers will prefer to make up their own dusting combination, and we are in position to supply such growers with Martin-Senour Superfine Dusting Sulfur and Martin-Senour Dry Powdered Arsenate of Lead for this work. Martin-Senour Superfine Dusting Sulfur is so finely divided that over 95 per cent will pass through a 200-mesh screen. Fineness is an important factor in successful dusting and the wise fruit grower will be careful to use a Sulfur and Arsenate of Lead that is very finely divided.

Prices—Market

PARIS GREEN

Martin-Senour Paris Green has by years of use proven its quality. It has become the standard Paris Green in many localities. It is light and fluffy, insuring good suspension in the spray tank and thorough covering of the foliage; contains approximately 56 per cent arsenious oxide and less water soluble arsenic than is allowed by law. It is one of the safest and most effective Paris Greens on the market today.

Price—Market

YOUR TREES NEED "SCALECIDE"

Because it kills *every kind of scale* and destroys the *aphis eggs* before they hatch

Because it wipes out the *Pearl Psylla*, *Bud Moth* and *Case-Bearer*. Also stops the growth of *Canker* and *Collar Rot*

Because it is *invigorating* to tree growth insuring *better fruit* and *bigger crops*

Because it *saves money, time* and *trouble*. You cannot afford to do without it

A reliable, simple and economical spray for San Jose Scale, Brown Scale, Red Scale, Pear Psylla, Rust Myte, White Fly and many other scale and soft-bodied insects. It also destroys many of the eggs and larvae of insects wintering on trees.

Prices—Market

"Black Leaf 40" TO DESTROY APHIS

WHAT "BLACK LEAF 40" IS

"Black Leaf 40" is a concentrated solution of nicotine sulphate, guaranteed to contain not less than 40% of nicotine by weight. It is perfectly soluble in cold water; does not clog the nozzle nor corrode the spray outfit; does not stain nor injure plants when used according to directions on the labels. It is highly recommended by Agricultural Colleges and Experiment Stations in Official Bulletins.

Price—Market

TREE TANGLEFOOT

A perfect safeguard against Gypsy Moth, Brown Tail and Tussock Moth, Caterpillars, Canker Worms, Cut Worms, Ants and other creeping insects. For tree surgery—nothing better on the market. It is unequalled for the treatment of trees after trimming or pruning.

1 lb. Can 60c 5 lb. Can \$2.75

TANGLEFOOT ROACH AND ANT POWDER

Is more certain to rid premises of Roaches and Ants than any irritating powder or liquid.

2 oz. Pkg. 10c ½ lb. Pkg. 25c
1 lb. Pkg. 50c

For Spraying Time

Don't let little hidden pests rob you of a big part of your vegetable crop or ruin your flowers and shrubs or prevent your hens from laying as they should—use disinfectant and sprays. Whether your spraying job is large or small, we have the right size sprayer for your work—a complete line of hand and power sprayers at reasonable prices are ready here for you and we have the various sprays too for all purposes.

The Myers Little Giant and Cog Gear Brass Bucket Spray Pumps

Fitted with Patent Agitator and
Return Overflow Cap

DETACHABLE HOSE
BRASS BALL VALVES

Each Bucket Spray Pump put up in
separate shipping carton.

Price

No. 327½ \$5.00

No. R-324 \$7.75

Use Pipe Extension

Extra Hose, less Nozzle . . . \$1.50

4 ft. Iron Pipe Extension . . . 40c

8 ft. Iron Pipe Extension . . . 60c

No. 327½ spray pumps are constructed entirely of brass. They are so arranged that the labor of pumping is all done on the down stroke of the piston and nothing on the up.

They are provided with a large air chamber and brass ball valves. The nozzle throws a continuous spray, and is not affected by the movement of the plunger. Will throw a solid stream 50 feet, and are of unusual value for spraying trees, washing windows and buggies, extinguishing fires, sprinkling lawns, flowers, etc. For spraying, they are arranged to discharge a fine jet in the bottom of the bucket to keep the solution thoroughly mixed and agitated. The pumps are also provided with a sprinkler for flowers.

No. R324 illustrates the Myers Bucket Spray Pump with Cog Gear Handle. This pump has 1½ inch diameter brass cylinder with solid plunger, brass ball valves, brass air chamber and discharge tube. The foot rest, head and cog gear handle are malleable iron. The large cylinder in combination with the cog-gear handle makes this an exceptionally easy working pump of more than ordinary capacity. Has patented jet agitator which keeps liquids thoroughly mixed.

A Spray Pump Without an Agitator Is Not Practical

The Myers Cog Gear Barrel Spray Pump

WITH MALLEABLE IRON BASE

Cylinder, Valves, Valve Seats and Discharge All Brass 2 Inch Cylinder
All Working Parts Submerged in Liquid, Hence No Priming Necessary
Has Mechanical and Jet Agitators Size of Hole to Cut in Barrel 8x8 Inches

The construction is such that the entire pump sets inside the barrel containing the liquid, being bolted fast at its upper end to the head of the barrel. By this arrangement the working parts are entirely submerged in the liquid that is to be sprayed, thereby avoiding all possibilities of losing priming, doing away with the necessity of a suction pipe, placing the agitator in the bottom of the liquid in a simple form, and also doing away with a large number of complicated parts. Base fits 8x8 inch hole.

Has Bronze Ball Valves and Brass Seats. The plunger is self-expanding. Will handle any caustic mixture. The cylinder and discharge pipes are all brass. The air chamber is 32 inches in length, enabling the pump to throw a uniform, constant and elastic spray. It has good leverage, is very powerful and easily operated.

Price Complete with one lead of 15 ft. 5 ply $\frac{1}{2}$ in. Discharge Hose and Graduated Nozzle \$18.00

ALWAYS USE PIPE EXTENSION—YOU GET BETTER RESULTS

No. R318B

PAT JET AGITATOR

The Myers Portable Sprayer

Generally Recommended for Outside Work

The pump is similar to No. R318B fitted with cog gear handle and dasher agitator. It is securely attached to the tank by means of a clamp connected direct to the channel iron that surrounds the top of the tank held in position by one thumb screw. The handle can be located at any point desired.

Price of No. R336B with Dasher Agitator, 15 ft. of $\frac{1}{2}$ in. 5 ply Discharge Hose, 8 ft. Extension with Vermorel Nozzle \$30.00

Use Myers Spray Pumps for Spraying Cattle and Hogs to remove Ticks or Lice. Much Cheaper Than Building a Vat and Just as Effective.

No. R336B

The Myers Whitewash, Cold Water Painting Machine and General Purpose Sprayer

With Easy Operating Cog Gear Pump, Fitted with Patent Double Agitator

No. R329 represents the Myers Whitewash, Cold Water Painting Machine and General Purpose Sprayer, with patent Double Agitator—a most complete and serviceable outfit. The tank is made of heavy galvanized iron with a wide bottom so as to set steady in operation. The cover is removable and is held securely in place by two thumb nuts, one on each side, which holds the cover tight and prevents spilling or splashing of the liquid. Holds 7 gallons.

The pump is our No. R324 Cog Gear Bucket Spray Pump, fitted with Bordeaux nozzle, brass ball valves, and has both jet and dasher agitators. Cog Gear increases leverage, 33 1-3%.

Price Complete with 8 ft. Pipe Extension, \$15.00

No. R329

The Myers Junior ^{LOW DOWN} Power Spray Rig

With All Steel Short Turn Truck

Complete Except Engine. Double Acting Pump, Belt Driven. 46 in. Tread, 43 in. High, 78 in. Long

A Good Community Sprayer

CAPACITY

5¼ Gal. at 50 R. P. M.
6¼ Gal. at 60 R. P. M.

Furnished with Thills instead of Pole if specified on order

Specially designed for the farmer with a small orchard who raises fruit for his own use, or what is generally known as Farmers' Spray Rings or Community Spraying where several farmers combine to do their own spraying or hire one of their number to spray for all.

No. 17 illustrates the Myers Junior Low Down Power Spray Rig as furnished ready for the field with the exception of the engine. It has a 100 gallon Cypress Tank and is equipped with our regular No. 580, 2x4 in., Spray Pump.

Wheels: rear 30x4 in. face; front 20x4 in. face; 46 in. tread. Front wheels pass under the frame permitting the shortest possible turn. Has drop rear axle made of 1½ in. shafting, thoroughly braced, supporting the tank direct. The front axle is made of Cold Rolled Shafting with heavy Cast Iron Housing, full length.

Deck has engine space 22 in. wide x 30 in. long, permitting the use of an exceptionally large engine when desired. Entire length of rig is 78 inches. The distance from the top of the tank to the ground line is only 43 inches. When team is turned to one side access to all parts of engine is permitted.

PUMP, No. 580, double acting, back geared 5 to 1.
PLUNGER, brass, telescope pattern, hemp packed.
PISTON, solid brass, with heavy brass stuffing nut.
PULLEY, 14x2½ inch, crown face.
BOXES, bored, of extra length.

VALVES and SEATS, brass beveled and ground in.

CYLINDER, 2x4 inch, removable brass shell.

WRIST PIN, 1¼ inch.

GEAR and PINION, machine cut.

EQUIPPED AS FOLLOWS:

One Myers Spray Gun. 25 feet of ½ inch Myers Spray Electric High Pressure Discharge Hose with fittings complete. Double cut-off for discharge lines, pressure gauge, agitator, belt tightener, relief valve, strainer and suction hose.

Price of No. 17 Myers Jr. Low Down Power Spray Rig, 100 Gallon Tank, All Steel Track, (engine not included) \$210.00

The Myers Pneumatic Compressed Air Sprayer

With Self Locking D-Handle and Screw Top

With Adjustable Long Distance Spray Nozzle

No. 296

No. 296 illustrates the Myers Pneumatic Sprayer as built to meet the demands for this style of Spray Pump. It is made of heavy galvanized iron with 1¾ inch brass tube cylinder attached to the can by means of a heavy brass screw nut. The small diameter cylinder operates easier than larger sizes. The nut is operated by lugs on the lower part of the handle, which engage in opening at the top of the nut. By means of these lugs and handle the nut can be screwed tightly to the top of tank, and at the same time lock the plunger in opposition which also permits of the tank being carried by the handle when desired. In the Myers construction we have done away with the large butterfly nuts as used on others, which are very objectionable owing to the fact that it is not only difficult to screw the cap perfectly tight but also very injurious to the hands in pumping.

THE HANDLE is D-shaped in form, and large enough to be operated by any one with perfect comfort.

No. 296 Complete, galvanized iron, \$7.25

No. 297 Complete, brass tank, \$11.00

Midget Atomizer

A small well made Sprayer for general purposes and especially adapted for use in and about the home. Will handle all kinds of liquids satisfactorily. Made of heavy tin. No. 202—Price 40c.

Faultless Atomizer

The Improved Faultless Sprayer is absolutely the best constructed Sprayer of its class ever offered to the trade. For strength and durability, it has no equal. The tapering point to the air chamber gives great force to the Spray, carrying it to the greatest possible distance. The tapering tube of air chamber is passed through the reservoir and thoroughly soldered to it. The point of the air chamber and small tube through which the liquid passes are thoroughly protected from damage in use and shipping. The piston rod is a heavy steel spring wire with cup leather plunger.

No. 1—All Tin.....50c
No. 2—All Brass.....\$1.45 No. 4—Galvanized Can..60c

Continuous Sprayer

The Continuous Sprayer is a popular pattern for a great many uses. It will handle all solutions—chemicals, insecticides, disinfectants, etc. Construction permits it to operate in any position. Fitted with straight and angle nozzle tips and removable. All working parts are brass.

Price: No. 422—Heavy Tin 90c. No. 422G—Galvanized \$1.00

Powder Gun

A special sprayer to drive powder down into cracks and crevices. Fitted with a long pointed tube which may be inserted into holes, cracks, etc. It is also provided with a fishtail spreader for use along long cracks in the floor, mopboards, etc. Nozzles are interchangeable.

No. 653—Price 50c

Perfection Compressed Air Sprayer

A high grade compressed air sprayer for general work around the house and yard, outhouses, on truck farms, in vineyards, potato, onion and melon fields, disinfecting, deodorizing treating cattle, sheep hogs, etc.

Tank 7½ in. diameter, 20 in. high; Capacity, 4 gallons.
No. 110 G — Galvanized \$6.75
No. 110 B — Solid Brass \$10.00

Vapor Bottle Sprayer

Made entirely of brass with brass valves. No parts to wear out. Made to fit any ordinary bottle. It is adapted for sprinkling clothes, spraying plants about the house, for spraying flower beds, bushes, etc. It throws a powerful spray, as fine as a mist, as fine as the steam coming from the tea kettle. Nicely nickel plated.

No. 65—Price \$1.50

No. 45 Sturdy Spray Pump

Made Entirely of Brass

Used with any pail, bucket, can, barrel or tank by placing bucket strainer in such vessel. Works with ease on the up and down stroke. One brass tube works inside of the other, has brass ball valves, which will not corrode or rust. It does not require extension rods for elevating the spray, for it will spray the tallest tree from the ground.

Used with a barrel for large orchard work. It is easily operated by one man. For all kinds of spraying purposes, garden vegetables, fruit trees, orchards, washing wagons, windows, spraying disinfectants, whitewashing stables and poultry houses and for all purposes where spraying is to be done. Has no leather packings or other parts to wear out.

Everything brass but hose and handle.

Four nozzles for all spraying purposes. 3 ft. best hose. Length, Brass barrel 24 in., brass bucket strainer 16 in.

No. 45—Price \$4.50

Junior Compressed Air Sprayer

Is made for the man who needs a high pressure compressed air Sprayer smaller than the Perfection. Adapted for the small garden, chicken house, hog pen or for disinfectants in hotels,

restaurants and other public buildings. Tank 6½ in. in diameter, 17 in. long. Capacity 2½ gallons.

No. 140G — Galvanized ... \$5.40
No. 140B — All Brass \$8.00

Insect Powder Gun

Cut shows our No. 1007 Whirlwind, gold lacquered tin, 4 in. in diameter, 2½ in. deep. Capacity 4 oz. powder.

Price 50c

No. 999 Cyclone, bright tin, 3½ in. in diameter, 1¼ in. deep. Capacity 2 oz. powder.

Price 35c

Reasons Why the FEENY MODEL B Is The Best Duster Made.

No other duster has the patented piston packing features of the model B Duster. These features allow of the greatest moving volume of air and the greatest force with the least possible mechanical friction, insuring the easiest operation and the greatest life of the working parts. Dusters which move an equal volume of air, fail in attaining the perfection of the model B, because they lack these essential features and over-tax the strength of the operator. They "run too hard." Dusters which do not move an equal volume of air, fail because they do NOT do the work at all—they just make a feeble attempt at it. With the Model B, the slightest movement forward of the piston, produces a dust cloud of the highest type. This is due to the perfect compression which is accomplished in no other dusting device.

The dust cloud starts the instant the handle is pushed forward and may be regulated from the thinnest "haze" to a large cloud having much force, by the stroke you give it.

It is impossible to produce a Duster to operate so perfectly as the Model B—without copying it in every detail. The Feeny

Manufacturing Company owns the patents and are the only manufacturers of the Model B Dusters.

THE CLEANEST, EASIEST AND MOST CONVENIENT WAY TO KILL THE BUGS AND INSECTS IN YOUR GARDEN, ON YOUR FLOWERS, SHRUBS AND TREES

The use of the Model B Duster is nothing like the old dirty, sloppy job of trying to kill bugs and insects in your garden with a liquid sprayer—the Model B is always ready to pick up and use—so clean that you may do your dusting with your good clothes on. Your Garden, Flowers, Fruit, Bushes, etc., will not suffer from insect pests if you have a Model B Duster handy—it does not have to be cleaned after use, as do sprayers—you simply use it, lay it aside and pick it up all ready for use the next time. It is so easy, clean and convenient that it is really fascinating to use the Model B Duster.

PRICE \$1.25

THE MOST EFFECTIVE

The dust cloud from a MODEL B DUSTER COVERS EVERY SURFACE of the THING THAT IS TO BE DUSTED—TOP, sides, underside and ALL—HUNTS EVERY CRACK AND CREVICE—nothing escapes being treated—IT DOES THE JOB COMPLETELY—why waste your time and material with ineffective sprayers and make-shift dusters.

The FEENY MODEL B DUSTER HAS MANY USES

The Model B Duster has many uses besides applying all kinds of insecticides and fungicides to gardens, flowers, trees, shrubs, etc. It is ideal for killing flies, bugs, roaches, etc., in homes, hotels and restaurants—for killing lice and other vermin in chicken houses; for using hog and cattle powder on the animals or in the barns, pens or stables.

Whenever it is desired to apply any powdered material in its finest, atomized form, the Feeny Model B Duster is positively the best instrument for such application.

ADJUSTABLE TRELLISES

Made in 3 Sizes

- No. 1—35 in. wide when folded; 30 in. wide if extended 8 ft.; 20 in. wide if extended 12 ft. Price, painted white, \$1.35.
- No. 2—47 in. wide when folded; 40 in. wide if extended 8 ft.; 30 in. wide if extended 14 ft. Price, painted white, \$1.80.
- No. 3.—71 in. wide when folded; 63 in. wide if extended 8 ft.; 32 in. wide if extended 16 ft. Price, painted white, \$2.40.

SECTIONAL TRELLISES

No. 4 is an exceptional fine trellis, well painted, and is made for those who want something better than the ordinary. Each section is $17\frac{1}{2}$ in. wide, and 8 ft. tall, this being the proper height for any ordinary porch from floor to ceiling. It is evident that by this means you can build your trellis as narrow or as wide as you want it by the use of 1, 2, 3 or as many sections as you desire to use.

No. 4 sells at \$1.80 per section.

SECTIONAL TRELLIS No. 5

This Trellis is same dimensions as No. 4. That is, $17\frac{1}{2}$ in. wide by 8 ft. high. Thus one section is $17\frac{1}{2} \times 8$; two sections, 35×8 ; three sections, $52\frac{1}{2} \times 8$, and so on. Cut shows one section. It can be used in various ways, same as No. 4, and although not so elaborate, makes a very neat trim. Think of it, a trellis 35 in. wide by 8 ft. high for \$1.80, well painted and ready to nail up to porch.

No use using baggy, saggy, rusty poultry netting for your vines, when you can buy a real ornament at these prices. If painted once every year or two they will last indefinitely.

Price, 90c per section.

No. 4

No. 5

No. 6 and 7

No. 6 Fan, 6 feet tall, spread 45 inches.....Price, \$1.35

No. 7 Fan, 8 feet tall, spread 60 inches.....Price, \$1.65

ORNAMENTAL FAN TRELLIS

A very neat lawn ornament at a very cheap price, made in two sizes and shipped straight, that is not spread out. However, proper nails for fastening cross-pieces are packed with each fan, and all pieces plainly marked, so it is only a matter of a few moments to spread out and attach cross-pieces.

No. 9

ROUND TOP ARCH No. 9

A thing of Beauty, and a Joy Forever. Uprights, $1\frac{3}{4} \times 1\frac{3}{4}$, 6 ft. 2 in., 7 ft. high at center. Spread, $4\frac{1}{2}$ ft. wide, and 32 in. deep. Bows across top are made of $\frac{3}{4}$ -in. galvanized tubing, and firmly bolted into uprights. Inserting ends of tubes into uprights and tightening up 4 bolts is practically all there is to setting up this arch.

Without Seats, \$8.40

With Seats, \$9.90

ROUND TOP PERGOLA No. 11

Here is one of the most beautiful Lawn Pieces imaginable, and at a very nominal price. This piece is suitable for a single rose bush or vine of any kind, while the arches are more adapted to taking care of two plants, on either side of a walk, gate or door. Uprights, $1\frac{3}{4} \times 1\frac{3}{4}$, 7 ft. high. Span across top 5 ft. Width, 32 in. Assembled by driving up nails. Price, \$4.95.

No. 12

PERGOLA DELUXE

The cut shows this piece perfectly so there is not much use of comment on it. It is good enough for the millionaire and cheap enough in price for the ordinary fellow.

Uprights, 2x2; cross-pieces, 2x4; 7 ft. high, 6 ft. across top.

Price, well painted,
\$12.00

8 ft. across top, \$12.90
10 ft. across top, 13.80

"Buckeye" Incubators

Fire-Proof and Fool-Proof

The Last Word in Incubators

BUCKEYE INCUBATORS ARE UNQUESTIONABLY THE MOST SUCCESSFUL HATCHING DEVICES THAT HAVE EVER BEEN PLACED ON THE MARKET. EACH AND EVERY MACHINE IS SOLD UNDER AN ABSOLUTE GUARANTEE TO HATCH MORE CHICKS AND BIGGER CHICKS THAN ANY OTHER INCUBATOR ON THE MARKET.

A Word About Value—

There is a world of difference in incubators—and a relatively slight difference in cost, when the importance of the purchase is considered.

You want results. You are buying your incubator for just one thing—profit.

Chicks that die in the shell, weaklings and cripples, without chance of maturity or salability are a dead loss.

It is important for you to **know** in advance which incubator will bring you the highest percentage hatches and the strongest, healthiest chicks. How can you **know**?

Incubators for the most part **look** very much alike. But consider—a wildcat mining stock certificate is just as handsomely engraved as a Government bond. Your incubator is an investment. And the first essential of every good investment is safety, **security**.

If you invest in a cheap incubator, you may save a little in price—you may even save what looks like a good deal. But suppose your hatches are poor—the percentage low, with an overwhelming number of cripples or suppose you lose an entire hatch. Not only is your profit gone, but your investment also. For you won't continue using a machine that has demonstrated itself a loser—throwing good money after bad.

There is one way that you can **know** in advance what incubator to purchase—for certain security and definite, profitable results, the highest percentage hatches of strong, lusty chicks. Ask the Buckeye user, he knows. There are many hundred thousand throughout the United States—doubtless one or more right near you. Ask them.

Also consider that Buckeyes are used by such renowned and experienced poultrymen as John Martin of Port Dover, Ontario; Charles A. Pape of Fort Wayne, Indiana, and by more than eight hundred of the largest and most successful commercial hatcheries in America—hatcheries with an average capacity of more than 50,000 eggs.

"Buckeye" Colony Brooders

The Now World Famous Buckeye Coal Burning "Colony" Brooder

The particular invention which made the Buckeye coal burning "colony" brooder such a complete success was an attachment to the stove which enables the operator to regulate the burning of the coal and hold a continuous fire without danger of overheating or going out. This regulator is thermostatically controlled and can be set to meet any kind of weather conditions. This invention has literally revolutionized the brooding of chicks, for it has replaced gambling with certainty, affording the ideal conditions under which chicks will thrive—warmth, ventilation and protection.

In the hands of the users, it has made three chicks grow where one grew before; it has cut the expense of operation into half of the former figures and it has reduced the labor required to a third—but even more important than that, it has removed the causes of the frightful mortality that made chicken raising such a gamble and in doing so has made a satisfactory profit possible for every breeder.

Broods Ten or One Thousand

Whether you have ten or ten hundred chicks under a Buckeye "Colony" Brooder the results are the same. It requires no special adjustment under any circumstances. You can remove part of the chicks at any time without disturbing the ideal conditions that existed before the change was made. The Buckeye is absolutely self-adjusting and automatically changes to meet the existing conditions.

Proven By Experience

How successfully this system of brooding has worked out is known to hundreds of thousands who regard it as essential to success.

Experiment station after experiment station has endorsed it; big and little breeders have enthusiastically commended it, and its use is growing wherever men and women realize its advantages.

Coal or Kerosene

Following the introduction of the "colony" type of coal burning brooders, the same general plan has since been adapted to kerosene burners of the blue flame type. Such burners have been brought to a high state of efficiency so that they are free from dangerous gases and by using such burners in combination with the open canopy, they have proven quite as satisfactory as the coal burning type, when operated in rooms that are supplied with auxiliary heat or in buildings that are small enough to be heated by kerosene burners.

Double and Single Feeding Troughs

FOR CHICKS AND GROWING STOCK

Made of best quality galvanized iron, accurately stamped with dies. No sharp or rough edges to injure the chicks. Sliding top.

Single—No. 55, 12 in., 35c No. 56, 18 in., 40c No. 57, 24 in., 55c
Double—No. 58, 12 in., 45c No. 59, 18 in., 60c No. 60, 24 in., 70c

Sanitary Feeding Troughs For Grown Fowls

Suitable for dry feed, wet mash, or water. The tops slide off, so the pan can be easily cleaned and filled. Made of best quality galvanized iron. In three sizes.

No. 21, 12 in., 40c No. 22, 18 in., 60c No. 23, 24 in., 75c

Round Baby Chick Feeders

The most popular baby chick feeder on the market. Made of the best quality galvanized iron, well made in every detail. Tops fit snugly, yet can be easily taken apart for cleaning and filling, can also be used for water or milk. Chickens can not upset it. Made in two sizes.

No. 11, Diameter 6 in., with 8 holes, 15c
No. 12, Diameter 8 1/4 in., with 12 holes, 25c

Norwich Chick Feeder

Impossible for chicks to pull out or scatter feed. Removable guard rod prevents chicks from getting into feed and is too small to permit their standing or roosting on it. Body of feeder made of galvanized steel with ends riveted and burred to malleable iron brackets. Can be used for grain, mash, sour milk or water with equal satisfaction.

Rain top protects feed from rain. The 20 in. will accommodate up to 25 chicks

Price \$1.00 each

The large size, 27 in., as per cut, is for growing chicks and old fowls.

Price \$2.00 each

Dry Mash Hoppers

A Hopper of great merit, made of heavy galvanized iron, the curved bottom keeps the feed within easy reach of the birds, and the taper shape of the Hopper—larger at the bottom prevents the feed from clogging, the wires prevent the fowls from throwing out or wasting the feed. When both covers are closed it is rat, mouse and weather proof.

Made in four sizes:

No. 35—19 in. high, 8 1/2 in. wide, capacity 10 qts. . \$1.50
No. 36—19 in. high, 12 in. wide, capacity 14 qts. . \$2.00
No. 37—19 in. high, 18 in. wide, capacity 22 qts. . \$2.40
No. 38—19 in. high, 24 in. wide, capacity 32 qts. . \$2.80

Poultry Supplies

Moe's Mammoth Dry Mash Hopper

A large capacity hopper built on correct principles. Made of heavy galvanized iron, strong and substantial in every detail.

Has many excellent features; for instance it will accommodate a full 100 lb. bag of mash, doing away with the annoyance and waste of having a partly empty bag of mash on the premises. The feed is within easy reach of the chickens, and is protected from the weather and from the ravages of rats and mice.

The taper shape and interior construction provides a uniform automatic feed, and the wire grid and cross wires prevents any waste.

The stand is of heavy angle iron, painted, and has wooden bars for the poultry to rest on when feeding.

Length of hopper 35 in. Width 21 in. Height $18\frac{1}{2}$ in. Capacity 100 lbs.

Height of stand $15\frac{1}{2}$ in. Total height $34\frac{1}{2}$ in.

No. 3—Hopper and stand complete. Price each \$9.50

The Enessee Dry Mash Hopper

Feed always dry and clean. Used by hanging with wire from ceiling with hopper high enough so chickens can reach feed.

Wire top prevents poultry from getting in or on hopper.

Rats and mice cannot get into it.

When suspended by wire from ceiling, serves as an exerciser for the chickens.

Fill hopper to swedge or about one inch from top.

Made of galvanized iron.

No. 100—Height, including wire top, $10\frac{1}{2}$ inches.

Height of pan 6 inches.

Price, \$1.00

Grit and Shell Boxes

The feeding of grit and charcoal is now recognized as an essential part of the diet, to keep fowls in healthy, prime condition.

There is no more economical method of supplying grit, etc., than with these practical, inexpensive compartment boxes.

Made of heavy galvanized iron.

The No. 45 for baby chicks has a square bottom.

No. 45—2 compartments, 8 in. high, 5 in. wide. . . . 40c

No. 9—3 compartments, 13 in. high, $8\frac{1}{2}$ in. wide. . . 90c

No. 90—4 compartments, 13 in. high, 11 in. wide. . \$1.25

Poultry Supplies

The Famous Star Fount

The Star is the most popular of all Star Founts—convenient, practical, low in price, and durable. Made of a single piece of heavy non-rusting metal. No seams, no solder, no loose parts. Provides a greater drinking surface than the round fount. Little chicks cannot drown. Made in one size only.

Will fit 1 pint, 1 quart and 2 quart Mason Jars.

No. 32 Star Fountain, each 10c

Bottom Fill Fountain

This fountain fills the breeder's requirements for a good inexpensive article. Made in two pieces accurately stamped and formed. Easily filled and cleaned. Made of the best quality iron in three popular sizes.

No. 19—capacity 1 quart . 35c

No. 20—capacity 2 quarts . 45c

No. 24—capacity 1 gallon . 60c

Royal Sanitary Thermic Fountain (NON-FREEZING)

Keep water warm in winter and cool in summer. Without warm water hens cannot produce eggs in winter at a profit. Cold water a single day will stop egg production a whole month.

No. 5—5 gallon size, each.....\$5.00

Wall Fountain

Removable bottom, a practical and convenient style of fountain, made of heavy galvanized iron. Can be hung on the wall, up out of the litter. A very popular style with many breeders. Made with a removable bottom so that all parts may be very easily cleaned and kept in a sanitary condition.

No. 26—capacity 1 gallon, each.....75c

Wall Fountain

Capacity 5 gallons

A large capacity fountain, made of heavy galvanized iron. This style appeals to many breeders, as it is a strong, substantial wall fountain at a low price. Excellently adapted for watering pigeons. Easily filled and nothing to get out of order.

No. 74

Height, 13 inches

Diameter, 11 inches

Price, each \$1.95

Little Putnam Stove

Holds three pints of oil and burns a month without attention. A wonderful little heater for the home-made warm water drinking fount, home-made oat sprouter, and home-made brooder.

Price, each \$2.50

Poultry Supplies

Poultry Punches

No. 38 Punch

A popular and practical punch for marking Baby Chicks.

Punches a clean hole in the web between the toes, and will not bruise the foot.

Guaranteed to work perfectly.

No. 38 Punch—25c each

Showing Different
Toe Marks

No. 39 Ideal Punch

A new improved Punch, scissors type. Works easily, cuts clean and does not pinch the foot.

Convenient to carry in vest pocket, and the lower end is an excellent cigar cutter.

Nickel plated finish. Length 3½ in.

No. 39 Ideal Punch—50c each

Key Ring Colored Leg Bands

Colored Leg Bands are made of celluloid, in fast colors. They are of a proper temper, keep their shape, light in weight and very durable.

Will not fade, and are weather proof. Quickly put on or removed, and make it easy to keep an accurate register of your birds.

Made in Six sizes as shown, and in Ten colors, as follows:

White, Black, Red, Garnet, Pink, Green, Dark Blue, Light Blue, Purple, Yellow.

Put up regularly 50 bands of a size and color in a bundle.

How to Feed Baby Chicks

The First 8 Weeks!
Mean Life or Death

That's when your big chick losses occur—during the first eight weeks—that's when you must have

Conkey's
TRADE MARK
THE ORIGINAL
Buttermilk Starting Feed

Prevents the big losses due to weakness and disease and gives your chicks the quick snappy getaway that produces early broilers and layers. The lactic acid in the buttermilk puts an edge to the appetite; strengthens and tones up the sensitive digestive organs of the little chicks, and helps to sweep away germs that cause White Diarrhea.

Semi-Solid Buttermilk Only

Is used in making Conkey's Buttermilk Starting Feed—never Dried Buttermilk. Semi-Solid Buttermilk incorporates thoroughly with the grain. Conkey's is the only Buttermilk Feed for chicks made according to the Original and successful Conkey process.

After 8 Weeks You Must Change the Feed

You Can't Get Satisfactory Results Feeding Growing Chicks a Starting Feed

Growing fowls—after 8 weeks—need a different feed. They must have more protein than the little chicks can stand. The same feed cannot serve for both purposes—for little chicks and for growing fowls—if you expect to get the best results.

That's why Conkey makes

Conkey's **The Original** **Buttermilk** **Growing Mash**

This is the great developing feed that most successful poultrymen use to bring their fowls quickly to early maturity—that insures early broilers and layers. Just right in protein and low in fibre. It is a wonderful bone and flesh builder. Feed it for rapid and certain results.

Conkey's Buttermilk Laying Mash

The Original

The third link in the Conkey Chain is balanced for a full egg basket. Low in fibre, just right in protein for layers.

This mash was placed on the market in response to an insistent demand for an honestly prepared, egg-producing ration that could always be depended upon to be clean and uniform. This demand arose through loss of egg production which is likely to follow a change of "balance" in feed—too many egg mashes unfortunately are variable in quality and therefore unreliable and costly if not positively dangerous.

To produce eggs in abundance, the flock must have a balanced ration consisting of a dry mash and a good scratch grain mixture, also a regular supply of green stuff. Grains alone

are not a sufficient ration for laying hens. Conkey's Buttermilk Laying Mash is made by Conkey's ORIGINAL process. Fresh, Semi-Solid buttermilk and other ingredients are blended so as to tempt the hen's appetite, thus increasing consumption of dry mash so essential to large egg production.

Conkey's Poultry Tonic

Every bird from chick to maturity will be more productive, healthier and more profitable if given a good tonic and regulator. Conkey's Poultry Tonic helps birds to get more out of their feed; they produce more eggs and better flesh on LESS FEED, by better digestion and assimilation.

Conkey's Tonic is all medicine—free from filler, red pepper, and "hot stuff" to overstimulate the birds and break down their health. Conkey's builds on a natural, healthy basis, inducing steady persistent laying. Keeps the young chicks growing, makes molting easy, strengthens the bird for bad weather and generally maintains a high health average.

Buy it by the pail. Packages, 25c, 50c, \$1.00; Pails, 12-lb. \$1.60; 25-lb. \$3.00; Bags, 50-lb. \$5.00; 100-lb. \$9.50.

Ask us for CONKEY POULTRY BOOK—an 80-page Handy Book of Reference on Poultry Raising—No Charge.

ROUP

Roup Is the Most Dreaded of All Poultry Diseases

Symptoms—First stage:—Chickens catching cold, eyes and nostrils become watery. The fowls will wheeze when breathing and will frequently sneeze and shake their heads to throw off the mucous.

Second stage:—One or both eyes will become inflamed. Bird will rub its head across its back as the nostrils become closed.

Third stage:—Swelling and hard lump of mucous under one or both eyes. Canker developed in mouth and on tongue. There is a catarrhal odor.

Roup is very contagious and the entire flock will soon become infected, after canker develops, for this is the last stage and unless drastic action is taken to prevent the windpipe from closing with canker, death is very sudden.

The Reason "SMOKE EM" Will Produce An Absolute Cure

The beginning of roup is caused by a cold. The mucous cannot escape from the nostrils after they become clogged. This mucous is carried to the eye and forms a lump causing considerable inflammation. Very often both eyes contain an accumulation of this mucous. There is a small channel connected with the eye and nostrils known as the tear socket. After the chicken contracts a cold the eyes start to water, and gradually the nostrils fill up with mucous until they are entirely clogged, then the tear socket becomes infected and when the mucous cannot find its way out it gradually discharges back through the nostrils to the inside of the mouth and windpipe, forming patches of canker.

It is an established fact that chickens must breathe as well as human beings. Therefore, the first thing to correct the condition of roup is to force the nostrils open so that the chicken can breathe. This is done by the chicken inhaling "SMOKE EM," which is so powerful it forces its way right through the nostrils of the chicken and dissolves the mucous in the nostrils and mouth, causing a free discharge of this diseased matter and thereby depositing the medicinal properties of "SMOKE EM" directly on the diseased parts of the bird, right up inside the nostrils and in the eyes and windpipe, etc.

"SMOKE EM" leaves a thick layer of black deposit covering the diseased parts, and after killing the disease germs will heal these affected parts and produce an absolute cure.

75c Per Can

Teeth and Tonic for Poultry

PEARL GRIT

The Double Purpose Grit

Scientists tell us that there is no known substance that aids a fowl's digestion as does good, clean, sharp grit. It enables the gizzard to prepare the food for digestion. It is a fowl's false teeth. When grit becomes worn out it is expelled. If new, sharp grit cannot be secured, the food must remain unground in the gizzard until it is softened and falls to pieces. This makes slow, imperfect digestion. It robs the hen of strength and robs you of eggs.

Grit of any kind is good for poultry because it enables the gizzard to prepare the food for digestion, but there is a best grade of grit just as there is a best grade of blooded stock, of corn, oats, hay, oil, coal—of everything.

Pearl Grit is more than a food grinder. Besides being the cleanest, whitest and sharpest grit that money can buy, Pearl Grit contains a generous supply of those minerals that the laying hen needs so badly in the production of eggs. Both Teeth and Tonic, it is a double purpose grit. When you scatter Pearl Grit you scatter all that the hen needs for its digestion as well as for egg making.

Sulphur and Carbohydrates, essentials in making eggs, are both contained in Pearl Grit. By mixing this double purpose grit with your feed, you are giving your hens a perfectly "balanced ration," and thus assuring yourself of a maximum amount of eggs.

Furthermore, the eggs will be of a better quality, as Pearl Grit is rich in calcium carbonate (lime), a substance that helps hens produce large, white, and hard-shelled eggs. Fowls fed on Pearl Grit never lay eggs with soft shells. This reduces your loss through breakage.

Pearl Grit is clean, white and nutritious. It imparts strength and vigor to young chicks and is most excellent for laying hens. It gives them exactly what they need to make them healthy, heavy layers. Its whiteness enables hens to find it easily and quickly.

In every sack of Pearl Grit that you buy, you receive double value because Pearl Grit is a double purpose grit. No shell-making materials, such as lime, magnesium, or oyster shells are needed. When you buy Pearl Grit you get all of these. Saves you time and labor and produces more eggs than are possible when ordinary grit is fed.

It is an economy to use Pearl Grit. When you use an inferior grit, you rob your hens of strength and rob yourself of eggs. Pearl Grit mixes with the feed, grinds the contents of the gizzard, stimulates the digestion, and increases the size, quality, and number of your eggs. Its cost is trifling, and your profits are large.

Price, per lb. 2c. Per 100 lbs. \$1.50

Kills Chicken Mites in Poultry Houses
Applied ONCE a YEAR—See Guarantee.

CHICKEN MITES

There are a number of insect parasites infesting poultry houses, etc., but very little is known about them and their habits, and they are generally called Lice. A distinction, however, should be made between that kind living on the body of fowls all the time, the "Body Lice," and those that bother the fowls, etc., during the night only and crawl away in the morning to spend the day in the cracks and crevices of the infested building. These are called "Hen-Lice" or Mites."

These mites are pests and genuine blood suckers and vampires and while the chickens can get rid of the body lice and keep them within limits by an occasional dust or sand bath, they are absolutely at the mercy of and helpless against the Mites, which suck their blood and gradually kill them.

It is therefore of vital interest to help the chickens, and the quicker the mites are cleaned out, the better it is. Results will quickly show in the shape of healthy Chickens and plenty of eggs.

There are quite a few remedies, however all of them are efficient only a short time, as they will quickly evaporate, and therefore must be applied almost continually. One single, annual application of Arrow Carbolineum will do the work. It will not only kill all the vermin by direct contact, but if sprayed or brushed, it will penetrate all cracks and crevices and reach the mites at close quarters and effectually stop their propagation.

Kills Chicken Mites in Poultry Houses
Apply once a year.

GUARANTEE

We guarantee that one thorough application of **ARROW CARBOLINEUM** either by brush or sprayer, to the interior walls, dropping boards, roosts, etc., to such buildings, after a previous cleaning and no matter whether they are of wood, tar paper or plaster, will exterminate mites in same **FOR A WHOLE YEAR.**

PRESERVES WOOD EVERYWHERE

Nut Brown Color:

Preserves wood everywhere against rot and decay and adds at least 100 per cent to the life of fence posts, poles, sills, floors, bridge timbers, porches and to wood imbedded in concrete.

Arrow Carbolineum will double or even treble the natural life of fence posts, etc., regardless of grade or specie of wood used, or the prevailing climatic conditions. Its use enables the use of inferior grades, even such as willow and cottonwood.

COVERING CAPACITY on average size posts:

40 posts per gallon for dipping butt.

60 posts per gallon for butt, brush use.

100 square feet rough lumber per gallon with two brush applications.

Price \$1.75 gallon. Quantity Price on Request.

Carbola is a white paint in powder form combined with a disinfectant many times stronger than pure carbolic acid. It is non-poisonous and non-caustic. It kills lice, mites, fly eggs, etc., and helps prevent the start and spread of contagious diseases that affect man, beast and fowl. Carbola is two things in one—a paint that disinfects or a disinfectant that paints. It dries a clear snow white. It saves labor, time and money. It paints and disinfects at one operation in the same time and with the same labor required to paint or disinfect only.

Carbola is recommended for use instead of whitewash in every place where whitewash ordinarily is used.

Garages	Cellars
Factories	Outbuildings
Warehouses	Tree Trunks

It is recommended for use instead of whitewash and disinfectants in

Stables	Barns
Kennels	Creameries
Poultry Houses	Hog Pens
Rabbit Hutches	Dairy Buildings

Carbola is superior to whitewash because it not only increases the light and improves the appearances, but destroys bad odors and mustiness. It guards against the start and spread of contagious disease germs, and deprives flies, spiders and other insects of their breeding haunts. Carbola in its dry state is recommended for sprinkling into closets, garbage pails and privy vaults.

In the Poultry House

There is nothing that contributes more to success in poultry raising than absolute cleanliness and sanitation in the poultry house. Clean living quarters mean as much as proper feeding. The best strain of poultry in the world, fed by best rations will not produce their best if the poultry house is not kept clean. Much of the decreased egg production and much of the sickness, low vitality and frequent mortality is due to unclean conditions. Without regular care the yards and ranges where the birds have been running on them constantly, become polluted and filthy—an ideal place for the breeding of disease. The houses soon become filled with red mites, which when present in any number are a great drain on the health and vigor of the flock. Every time you bury a chick you lose some profits. If the growth or production is retarded you lose other profits.

The **MARTIN-SENOUR Co.**

100% Pure Paint **MONARCH**

MONARCH PAINT IS COMPOSED OF
ABSOLUTELY

PURE WHITE LEAD
PURE OXIDE OF ZINC
PURE LINSEED OIL
AND COLOR

WHICH ARE THE BEST KNOWN
INGREDIENTS FOR PAINTS

Monarch Paint is guaranteed absolutely pure. is sold subject to chemical analysis and being made of pure materials it covers 25 per cent more surface, wears longer, and is therefore more economical than adulterated paint or lead and oil.

Monarch Paint has given entire satisfaction for over 40 years.

Senour's Floor Paint

Is a varnish paint and made to dry very hard with a high lustre and sufficient hardness and elasticity to withstand the wear and tear to which floor paints are subjected.

Neu-tone

A washable flat wall paint for interior decoration. It dries with a soft restful and beautiful finish, showing neither gloss nor lustre, and the colors are permanent under all conditions.

Wood-Var COLORED VARNISH

A beautiful and durable permanent finish for every class of interior woodwork, furniture, bric-a-brac or floors, and equal results are obtained on either old or new work.

Wood-Var is a combination of permanent stains, unsurpassed for clearness and richness of tone, combined with the highest grade of varnish possessing remarkable wearing elasticity and weather-resisting qualities.

Wood-Var is easy to apply, as it flows out well under the brush and dries without showing brush marks. It is prepared so that it brings out the beautiful grain of the wood and gives a richness of tone that will not fade or rub off.

By the use of Wood-Var, the less expensive woods can be made to closely resemble the more costly ones, such as Oak, Mahogany, Walnut, etc., while unsightly pine floors may be made to resemble the most beautiful hardwood floors.

Red School House Paint

Is made of selected English red oxide, machine mixed and ground in linseed oil. Covers more surface, lasts longer than the coarse hand-mixed materials.

Made in popular colors, including white.

For barns, fences, roofs, out-buildings and grain elevators.

Wagon and Tractor Paint

For finishing and refinishing wagons, tractors, sleighs, farm implements and all surfaces for which durability is essential and where appearance should be considered.

Screen Enamel

For protecting both the frame and the wire and is made expressly for this purpose. Black, green and white.

Screens should be gone over every year, and it will be found they will stand the weather better and last longer if given two coats.

Porch and Lawn Furniture Enamel

Is made from materials especially selected for the purpose. Ground in varnish, that, through many trying tests, has proved its ability to resist wear and maintain its gloss under the hardest exposure.

Auto Flat and Varnish Finishes

REFINISH YOUR CAR THE SAME WAY
THE AUTOMOBILE PAINTER WOULD
DO IT

Martin-Senour Co. have developed materials that are perfect in every respect—that have been made so that the most inexperienced can get fine results.

Many automobile owners are skeptical and hesitate to attempt repainting their own car.

—BUT—

By using Martin-Senour Auto Flat and Auto Varnish Finish you can get as fine a finish as though done by a professional.

Long Life

Doubles the Life of Your Brush and Keeps It
Like New Until Worn Too Short for Use

"LONG LIFE" is a preservative in which both new and used brushes should be kept submerged while not in use. The new brushes will be kept soft and pliable and will be prevented from ever becoming "Lousy." The Bristles will retain their animal life and will always be ready for service. Old brushes will be softened and renewed and made to work smoothly until worn too short for use.

MARTIN VARNISH CO.
MAKERS OF 100% PURE VARNISHES
CHICAGO

Martin Varnishes

Are made from pure varnish gums, pure varnish oils, pure turpentine, and labeled on every can.

100% Pure

Martin Varnishes absolutely contain no benzine, rosin or water, or any other adulterant.

MARTIN'S 100% PURE INTERIOR FINISH

Is an unusually durable and efficient interior varnish. It produces a rich gloss; may be rubbed and will not mar. Is not affected by moisture.

MARTIN'S 100% PURE FLOOR VARNISH

Is not affected by hot or cold water; will not mar or scratch white. Intended for all surfaces subjected to unusual wear.

MARTIN'S 100% PURE VELOUR FLAT FINISH

Gives a perfect imitation of a rubbed finish—either flat or semi-gloss—and saves the expense of such an operation. Can be applied over either old or new varnished surfaces; produces a soft satin finish.

MARTIN'S AMBER-LYTE FLOOR OIL

A wonderful finish for maple floors. Penetrates deeply into the pores of the wood, which acts both as a filler and surfacer. Dirt and grease spots cannot adhere to a surface finished with Amber-Lyte and scrubbing is reduced to a minimum.

Kyanize
KY-AN-IZE

Kyanize FLOOR FINISH

Excellent for both Floors and Furniture.

Kyanize Floor Finish is a colored varnish made expressly to resist scuff and hard wear. It is also very satisfactory for standing woodwork, doors and wainscoting.

Kyanize WHITE ENAMEL

The outstanding characteristics of Kyanize Enamel are its extraordinary durability, its smoothness in working under the brush, its elasticity, making it impervious to cracking, checking, peeling or softening; its ability to retain its marked whiteness and porcelain-like surface for a prolonged period.

The Kyanize New Tints carry the same unvarying qualities which have distinguished Kyanize White Enamel from all inferior products.

Kyanize WASHABLE CELOID FINISH

A semi-gloss or celoid enamel finish for all walls, woodwork and furniture. A finish that dries over night with a satin-like lustre. A very satisfactory finish for kitchen walls that require frequent cleaning. Made in white and delicately tinted shades. Very durable.

Kyanize BABY CAB ENAMELS

Whatever else may be desired in a baby carriage, an attractive trim appearance is above all. Our Kyanize Baby Cab Brown, Gray, Ivory and Blue are especially suited to transform the old stained carriage into a bright, lustrous and water-proof vehicle.

RIPOLIN --- The Original Holland Enamel Paint

Ripolin is known the world over for its wonderful working and wearing qualities. Long in oil, long in service, and beautiful

in effect, it is used on many of the most representative public and private buildings, both in Europe and America.

Garden and Lawn Implements

"Norcross" Cultivator-Hoes and Weeders

Will cultivate closer to plants without injuring them than any other type of implement known, leaving the soil level, loose and untrampled. The sharp, tapering shovels enter the ground easily and are so arranged, one with another, as to literally tear up every inch of the soil from one to five inches deep, as required. Detachable steel prongs, malleable head, extra high handles. Finely finished throughout. Three sizes, suited to both men and women, and the average cost is only that of a common hoe.

5 Adjustable Teeth, Long Handle..\$1.25 3 Adjustable Teeth, Long Handle.. .85
3 Adjustable Teeth, Short Handle.. .50

All-Purpose Rake

For Dandelion, Garden or Lawn

The All-Purpose Rake is unequalled for removing yellow dandelions. When it is pulled across the lawn, the stems, leaves and blossoms are wedged between its teeth and easily pulled out. It is also a first class rake for general work. It will pick up the acorns, pebbles, small twigs, etc., which an ordinary rake will not touch, and will clean the lawn of cut grass and dead leaves in better shape than is possible by any other means. It is self cleaning. A single backward stroke clears the rake—no pawing over the debris with your fingers. It is light and easy to handle, has great capacity, and is strong enough for the roughest use.

No. PE16—16 inch...\$1.00

The Barker

You Should Have a BARKER Because

It kills the weeds.
It makes a perfect soil mulch or moisture blanket.
It is the only garden implement that kills the weeds and makes a perfect soil mulch at one and the same operation.
It is the only hand cultivator that can instantly be turned into a weed killer and soil mulcher.
It is easy to operate—a boy or girl can run the BARKER.
A ten-year-old boy with a BARKER can do more than two men with wheel hoes—and do it better.
It works in all kinds of soil.
It runs smoothly—no tugging, no jerking, no pulling.
It saves time, saves work.
It will pay for itself in increased yields in a single season.
It is one hundred per cent efficient.
It is the "Best Weed Killer Ever Used."
It is the best garden implement for the market garden, for the farm garden, and for the city back-yard garden.

No. 10D—10 in...\$11.75 No. 12D—12 in...\$13.45

The "OUT-U-KUM" WEED PULLER

An Entirely New Principle
A slight Push and Pull thoroughly loosens the surrounding soil and removes not only the weed, but the ENTIRE ROOT.

A push and a pull, that's all—Out comes weed, root and all.
Out-U-Kum Weed Puller—75c

HUDSON GARDEN PLOW

The high wheel garden plow is a universal favorite with the truck farmer, or gardener where the work is sufficient to justify separate machines for seeding and cultivating.

It has all the equipment for plowing and hilling, raking, and cultivating either wide and shallow or narrow and deep. A 24-inch high wheel is used which makes traction very easy. Framework is of steel, giving great strength and rigidity without excessive weight. The Plow, double pointed shovel and sweep, are made of regular plow steel. The cultivating attachment is made from malleable iron and is equipped with 5 removable steel teeth.

No. 240—Garden Plow, price each...\$3.75
No. 2401—Five Prong Attachment, each... 1.25

The Hudson Seeder and Single or Double Wheel Cultivator

No. 201

hoe. All parts of the best material, well made and carefully fitted. It is a neat, well finished machine, which will give real satisfaction.

No. 201—Seeder and Cultivator, price each... \$16.75

The No. 201 Combination Seeder is a practically 100% perfect seeder. The seed regulator is made entirely of brass, with the openings die cut instead of being cast or moulded, so that it can be regulated perfectly. The seed flow adjustment is the heart and soul of a seeder, for if the drop is not uniform, the crop will be irregular and poor. It will sow any seed from beans down to the smallest garden variety in continuous drills, or in hills 4, 6, 8, 10, 12 or 24 inches apart. The furrow opening shoe and furrow coverers are adjustable for depth up to 2 inches. This machine opens the furrow, drops the seed, closes the furrow, packs the earth, and marks the next row in one operation.

The seeding parts can be detached by removing two bolts, and the seeder then becomes a single or double wheel cultivator, rake, plow, or

Lawn Mowers

"CLARINDA"

Clarinda Lawn Mowers are made of the highest grade materials obtainable. Strong frames; double cross bar construction; blades ground to a true, sharp edge which insures perfect cutting. Fountain Sprinklers

The Fountain Sprays are very durable—made of heavy brass no moving parts to get out of order—very easy to operate

Price—\$1.00

Rain King Sprinkler

Different from any other sprinkler made, may be used as revolving or stationary—fine or coarse, fast or slow—will sprinkle circle from 8 to 80 ft. Will revolve on a lower pressure than any other sprinkler made.

Price—\$3.50

Half Fountain Sprinklers

Made by the same manufacturer as the Fountain, has all of its good features. "Mist-like" spray, covers but half of full circle. Keeps the walk dry. User moves it without getting wet.

Price—85c

ACCESSORIES

Diamond Spray Nozzle

Throws more water farther and enables the user to cover more ground in less time. Made of heavy wrought brass. Durable, water tight; cannot rust.

Price 65c

Cream City Galvanized Sprinkling Cans

One piece spout, large oval breast, top and back handles are welded to body, which makes a very strong sprinkler.

Brass Marking Tags, $\frac{5}{8}$ in. in diameter, with black numerals. Numbered from 1 to 100.

Price: \$1.75 per 100

Exact Size

Small Pig Teeth Nippers.....Price \$2.25

Dana Permanent Ear Tags and Punches—Prices vary according to sizes, quantities, initials and numbers. Will quote prices on request.

Garden Wheelbarrows

Made from best of materials. Neatly finished. Iron leg braces, 20 in. iron wheel; every brace bolted. Inside measurements of box, 27 in. long, 18½ in. wide at wheel end, 23 in. wide at handle end. No pine used in its construction.

Price \$7.50

Mounted Grindstones

Tubular steel frame, slightly flexible, permitting same to adjust itself to uneven floors or surfaces. Frame is narrow at top, making it convenient to apply power. Spread at base, giving greater rigidity. Bi-Treadle, with power, properly applied. Stone movable horizontally on frame to suit convenience of operator.

Ball bearing journals and crank attachments fitted with detachable steel axle.

Seat made of steel, adjustable vertically 4 to 5 inches. Made in one size and furnished with one stone, guaranteed best quality Berea Grit, for general grinding. 20 to 22 inches in diameter, 1¾ to 2¼ in. thick. Price \$10.00.

No. 025

RU-BER-OLD ROOFING

There are many Ruberoid Roofs still in splendid condition, which were laid thirty years ago. An uncounted number of Ruberoid roofs have withstood fifteen, twenty and twenty-five years of service, without indicating the limit of their endurance.

Ruberoid is the best prepared roofing that the Ruberoid Co. can make, and they have had longer experience in the manufacture of prepared roofings than any other concern in the United States.

Price per Square Ruberoid—Medium \$3.15. Heavy \$3.75. Ex. Heavy \$4.15.

Price per Square Starex—Light \$1.55. Medium \$1.90. Heavy \$2.30.

Starex is made of cheaper materials, and put out to meet the demand for a medium priced roofing. It is a good piece of roofing for the price.

Our slate surfaced, green and red roofing can't be better for the price—\$2.65 per square. It is put up in strip shingles for \$6.45 per square.

Lawn and Garden Fertilizers

ARMOUR'S SPECIAL LAWN AND GARDEN 3-11-1

Make first application in spring, soon after frost leaves the ground. Apply 25 lbs. per thousand square feet. Follow with same application every sixty days. When seeding new lawns, use 50 lbs. per thousand square feet. Rake thoroughly into ground and then seed. For garden use, apply at the rate of 600 lbs. per acre. Mix thoroughly with the soil before seeding or transplanting. Price—50 lb. sack, \$1.75. 100 lb. sack, \$3.00.

BIG CROP RAW BONE MEAL 4½-22

Made from an accumulation of slaughter house bones, steamed enough to soften and make action more rapid. Best annual fertilizer manufactured. Excellent for rose beds and plants, vines, shrubs and trees—fruit or shade. Also good for bulbs indoors or outside. For roses and plants 50 lbs. per cubic yard; 25 lbs. each for grown trees; shrubs and vines use at rate of 500 lbs. per acre. Price—5 lb. pkg. 40c; 10 lb. pkg. 70c; 25 lb. sack \$1.35; 50 lb. sack \$2.25; 100 lb. sack \$3.50.

WIZARD SHEEP MANURE Makes Beautiful Lawns and Gardens

If you want a more beautiful lawn and garden plan to do most of your garden work in Fall instead of Spring. Fall planting in a rich fertile soil is, according to successful gardeners, the real secret of success. So plant everything you can in Fall—and let your first thought be the preparation of a rich fertile soil to develop the full possibilities of your garden.

The Best Lawns Are Made In The Fall

Fall is nature's time to sow grass seed and experts claim that the only way to secure a thick turf of the finer and more desirable grasses is to make your lawn in Fall as these grasses develop best during the cool Fall months. Many failures in lawn making are due to the hot dry summer weather following close upon late Spring sowing. Make changes that you

have planned and plant perennials and shrubs in their permanent location. All Fall work insures an established planting ready to start off rugged and strong with the first breath of Spring, fully a month or more before you can begin any planting in Spring.

A Fertile Soil Insures Success

Whatever you do, don't forget the needs of your plants because you cannot get results on a poor wornout soil. Wizard Sheep Manure improves the soil and gives it just what it needs to make plants grow to perfection. Wizard is economical, convenient and absolutely weedless. One bag will prove as effective as a WHOLE WAGON LOAD OF STABLE MANURE. Use Wizard in the Fall and you will have a better lawn and garden the next Spring.

Beware of the inferior substitutes now on the market, which are being sold as Sheep Manure. If you want results and the best Sheep Manure on the market—insist on Wizard Brand. Wizard is genuine Sheep Manure and you can depend upon it for results.

Price—2 lb. pkg. 20c; 5 lb. pkg. 35c; 10 lb. pkg. 65c;
100 lb. sack \$3.25.

DON'T PLANT WITHOUT WIZARD BRAND

BULBS, PLANTS and NURSERY STOCK SECTION

...Introductory...

TWO YEARS AGO WHEN WE OPENED OUR GARDEN SEED DEPARTMENT
WE ADOPTED THE SLOGAN

"Buy Your Seeds at Home"

IN TWO YEARS TIME THIS DEPARTMENT HAS GROWN TO SUCH PROPORTIONS THAT OUR 1924 SLOGAN IS

"Buy Your Garden Seeds, Plants,
Bulbs and Nursery Stock at Home"

WE EXERCISED THE SAME CARE AND THOROUGH RESEARCH IN SELECTING OUR LINE OF NURSERY STOCK AS WE DID WHEN SELECTING LEONARD GARDEN SEEDS.

WE CAN TRUTHFULLY SAY, AS HAVE MANY WHOM WE SOLD NURSERY STOCK TO THIS FALL, THAT WE CAN'T SEE HOW IT IS POSSIBLE TO GROW BETTER.

OUR NURSERY CONNECTION IS DIRECT WITH NORTHERN ILLINOIS GROWERS (THEREFORE ACCLIMATED TO THIS TERRITORY) BACKED UP BY 30 YEARS OF FAITHFUL SERVICE—EVERYTHING BEING OF THE HIGHEST GRADE AND QUALITY, ALSO TRUE TO NAME.

A COPY OF INSPECTION FROM STATE ENTOMOLOGIST WITH EACH AND EVERY ORDER.

Think of Seeds, Plants, Bulbs and Shrubs --- Think of BARRETT'S

GLADIOLI *"The Glory of the Garden"*

The improved Gladiolus is one of the most beautiful of the summer blooming flowers, and it is so easily grown as to be within the reach of anyone. This flower is now very popular and is becoming more and more of a favorite each year because of the remarkable improvements in size and delicate colorings rivaled only in the tropical orchids. There is a touch of grandeur and magnificence about it that places it in a distinctly superior class. It is easily grown and may be had in bloom nearly four months in the year in the Northern climate without the aid of glass, and it possesses a combination of characteristics that appeals to all flower lovers.

The blossoms are wonderful in form and size, and embrace a beautiful range of colors with almost an endless number of combinations impossible to describe. New varieties are continually appearing from the plain petaled sorts to charming ruffled and beautifully lacinated types, which is a proof of the increasing interest in this wonderfully responsive flower. It has a capacity for taking up water which enables it to go on blooming to the very tip of the spike after being cut, lasting a week or more in the hottest weather.

Invest a few dollars in Gladiolus bulbs this year, for in no other way can you purchase so much pleasure as you will get from these bulbs. The money will be well spent and you are making a permanent investment because your Gladiolus bulbs increase year by year. Every time you walk into your garden or glance at the bouquet on your table you will be glad you spent the money.

HOW TO GROW BEAUTIFUL GLADIOLI

With every order we send free a leaflet, telling When and How to Plant Gladiolus Bulbs, proper soil and location, cultivation, cutting the blooms, harvesting and storing the bulbs and bulblets.

In buying bulbs size is no criterion, as many choice sorts do not produce large bulbs. The essentials are that the bulbs be well developed, firm, healthy, and of blooming age, which large ones are often past.

FLOWERING BULBS FOR FALL PLANTING

Fall Bulbs Planted in the Garden, Beds or Lawn are Gorgeously Effective When in Flower During the Spring. Our Stock contains the Largest and Best Bulbs That the Variety Produces Direct from the Growers at Sassenheim, Holland

*Here are just a few remarks
from Mr. Winter, proprietor
of the Nursery from whom
we purchase our stock:*

The Quality and High Grade of Stock listed in this catalog is not to be classed with other catalog stock. Our stock is extra heavy and handled in a first-class manner from the time it is planted in the nursery until it reaches our customer.

Do not hesitate in placing an order. We'll always treat you right.

ATTENTION—PLEASE

In regard to varieties. The most of our customers who have planted orchards the last years, have left the entire selection to us; only stating how many early, medium, or late kinds wanted. We will choose the best varieties for this climate, for cropping, eating, or for market. I will certainly take pleasure in doing this for our customers. I think I can serve them better than they could themselves, as I have judged the fruit exhibit at The Illinois State Fair for a number of years. I also handled the fruit exhibit at the Illinois State Horticultural Meeting for some years, and I think I ought to be capable of being of some benefit to customers in choosing varieties for their orchard planting.

LANDSCAPE DEPARTMENT

We have in our employ a first-class Landscape man. One who is capable of laying out or planting any design. For private homes, parks, or any large estates. Nothing too large for us to handle. Anyone wishing such work done, we will be glad to send our man to thoroughly inspect the grounds, make a drawing of same, and furnish an estimate of what the work will cost.

NURSERY STOCK

APPLES AND CRAB APPLES

	Each	Dozen
No. 1 Grade—3 years.....	\$1.00	\$11.00
Extra Heavy Grade—3 years.....	1.25	14.00

SUMMER AND AUTUMN
